

Overview

The DSCI Certified Privacy Champion is a one-day program designed to equip professionals across business functions with the essential knowledge and skills to navigate the evolving data privacy landscape, particularly in light of the DPDP Act. Privacy Champions are essential to building a robust privacy program.

Data Privacy is not just a responsibility of privacy, security or legal teams, it's a shared responsibility of all the key business functions within the organization. Developing Privacy Champions early in your privacy journey is a strategic investment that yields significant long-term benefits. It accelerates privacy maturity by fostering understanding, streamlining implementation, and expediting compliance.

How can Privacy Champions benefit your Privacy Program?

Privacy Champions act as your organization's "eyes and ears" on the ground, providing crucial support by:

Monitoring and identifying potential privacy risks and issues within their teams.

Serving as policy enablers, promoting understanding and adherence to privacy policies and processes.

Functioning as a liaison between their teams and the central privacy program, ensuring effective communication and collaboration.

Acting as privacy ambassadors, fostering a culture of privacy awareness and responsibility.

DSCI Certified Privacy Champion Program

Privacy for non-privacy
professionals

How can this program benefit Privacy Champions?

Skill Development:
They gain valuable knowledge and skills in data privacy, a highly sought-after area in today's job market.

Career Advancement:
This expertise can enhance their professional profile and open up new career opportunities.

Increased Recognition:
They become a recognized point of contact and a valuable resource within their team and the organization.

Personal Empowerment:
They gain a deeper understanding of data privacy principles, empowering them to protect their own privacy and the privacy of others.
